---

## EDUCATION

University of Nevada, Las Vegas - Bachelor of Science in Computer Science

December 2024

## TECHNICAL SKILLS

- 
- Languages: Python, TypeScript, Kotlin, C#, SQL, JavaScript, C++ , HTML, CSS
  - Frameworks & Libraries: React, React Native, Flask, Expo
  - Tools: Visual Studio Code, Git/Github, Unity, REST APIs, PostgreSQL, Android Studio

## WORK EXPERIENCE

---

**Richtech Robotics** - Las Vegas, NV

December 2025 - Present

*Technical Solutions Specialist (Software Engineering)*

- Led a team of 6 developers in rewriting an Android/Kotlin robotic control application, designing application architecture and integrating REST APIs for robot communication
- Developed Kotlin mobile application features integrating with robotic systems through REST APIs for real-time robot control and monitoring
- Participated in code reviews and managed Git workflows to coordinate feature development across a 6-person engineering team

**The Coder School** - Henderson, NV

February 2025 - December 2025

*Code Coach*

- Taught programming fundamentals through Python, JavaScript, and Unity/C# while designing lessons around student skill levels and project goals
- Mentored students through debugging, problem solving, and software design while helping them build and complete coding projects

## PERSONAL PROJECTS

---

**Budget Buddy** - Python, Flask, TypeScript, React, HTML, CSS

- Developed a full-stack budgeting web application using React, TypeScript, Flask, and PostgreSQL.
- Implemented a secure user login system using JWT authentication, password hashing, and Google reCAPTCHA to prevent bot sign-ups
- Implemented efficient React state management and component architecture to improve application responsiveness

**Grav Lab** - C#, Unity

- Designed and developed a 2D puzzle game in Unity where players rotate gravity to solve tile-based challenges
- Implemented custom physics and grid mechanics in C#, including collision detection, goal states, and puzzle progression
